PROFILE

Technology-focused Senior PM/PO with 4+ years of experience owning mission-critical digital commerce platforms at Cencosud, one of Latin America's largest retailers (~\$15B revenue). Deep expertise in real-time inventory systems, omnichannel logistics, and last-mile fulfillment. Proven track record of shipping data-driven products that measurably improve conversion, promise accuracy and operational efficiency — at scale across multiple countries and tech stacks (CommerceTools, VTEX). Engineering background (M.Sc. Transportation, PUC Chile) with strong analytical skills in Python, SQL and AWS.

PROFESSIONAL EXPERIENCE

Senior Product Owner — Digital Commerce & Core Platforms

Cencosud S.A. · Dec 2025 – Present

Cencosud is one of Latin America's largest retail conglomerates, operating Paris, Jumbo and Easy across 6 countries.

- Own the end-to-end product strategy for Inventory, GIV (Global Inventory Visibility) and Promise Engine — mission-critical platforms serving 100% of e-commerce transactions across Paris, Jumbo and Easy.
- Reduced stockout rate to <0.01% on Paris.cl by leading the full-scale rollout of GIV — a real-time availability engine considering stock levels, logistics capacity and operational constraints — across 3 major Cencosud banners in Chile, with regional expansion underway.
- Cut checkout load time for shipping dates and grouping from 8s to 2s at p95, directly improving conversion in the critical purchase funnel.
- Built a plug-and-play logistics ecosystem adaptable to multiple e-commerce tech stacks (CommerceTools, VTEX), enabling faster banner onboarding and scalable architecture.
- Lead 3 cross-functional squads (4 analysts + 20 engineers across 3 Tech Leads), driving roadmap planning, stakeholder alignment and strategic prioritization at scale.
- Define and monitor KPIs for promise accuracy, fulfillment reliability and customer experience to enable data-driven decisions across business and technology teams.

Product Owner — Digital Commerce & Logistics

Cencosud S.A. · Jan 2024 – Nov 2025

- Led checkout and fulfillment product squads for Shipping Methods, Promise Engine, Balancer and Inventory — covering national and regional e-commerce operations.
- Unified 1P and 3P product delivery experience, reducing average 3P delivery time to ~1.2 days and aligning service levels across marketplace and own inventory.
- Centralized logistics configuration management into a single unified frontend, reducing operational friction and giving ops teams a cleaner, faster toolset.
- Owned roadmap prioritization and cross-team stakeholder alignment; ran Scrum ceremonies and drove continuous delivery of high-impact features.
- Contributed to large-scale digital transformation initiatives across omnichannel logistics and last-mile fulfillment.

Business Analyst — Digital Logistics & Marketplace

Cencosud S.A. · Mar 2022 – Jan 2024

- Acted as bridge between business stakeholders (Paris.cl, Marketplace) and IT teams — translating requirements, negotiating priorities and validating releases (QA).
- Supported digital transformation across marketplace logistics flows (dropshipping and fulfillment), focusing on conversion uplift and operational efficiency.
- Used Python and SQL to build analytical frameworks supporting strategic decisions and product improvements.

Pricing & Revenue Management Analyst

Blue Express S.A. · Sep 2021 – Mar 2022

- Redesigned tariff structures across all Chilean communes and led competitive pricing proposals for strategic clients including Amazon, Falabella and Cencosud.
- Delivered monthly profitability analyses identifying quick wins to improve margin efficiency.
- Built web scraping pipelines in Python and dashboards in Tableau to support pricing benchmarking (local and international).

Teaching Assistant

Pontificia Universidad Católica de Chile · Mar 2016 – Jul 2021

- TA for 7 courses: Economics, Optimization, Transport Economics, Urban Transport Policy, Transport Systems Planning, Operations Management, and Social Project Evaluation.

EDUCATION

M.Sc. in Engineering Sciences (Transportation)

Pontificia Universidad Católica de Chile · 2019 – 2022

Thesis focus: urban logistics optimization and demand modelling.

B.Sc. / M.Sc. equivalent — Industrial Engineering (Transportation)

Pontificia Universidad Católica de Chile · 2015 – 2020

Top-ranked engineering school in Chile.

Full Stack Web Development Bootcamp (In Progress)

Desafío Latam · 2026 – Present

Covering modern full-stack development: HTML, CSS, JavaScript, Node.js, React and databases.

Diploma in Big Data & Data Science Tools

Universidad de los Andes · 2024 – 2025

SKILLS & STACK

PRODUCT Roadmap strategy, backlog management, OKRs/KPIs, Scrum/Agile, stakeholder management, discovery & delivery

DATA & ENGINEERING Python, SQL, JavaScript, R, AWS, Postman (API testing)

AI & LLMS Claude (Anthropic) — prompt engineering, AI-powered product tooling, workflow automation with LLMs; applied daily in product development and decision-making

TOOLING Jira, Confluence, Miro, CommerceTools, VTEX, Tableau, Microsoft Office (Professional)

DOMAINS Real-time inventory, promise engine, last-mile logistics, omnichannel e-commerce, marketplace (1P/3P)

LANGUAGES Spanish (native) · English (professional working proficiency)
